Sauna Large

SAUNRESLA Sauna 3 WHITE

The Bertilo Sauna Large offers 6.4 m³ of spacious interior volume, providing plenty of room for relaxing sauna sessions. Its modular front wall with large windows creates a bright and pleasant atmosphere, while the comfortably sized 231 cm-long sauna bench offers ample space to relax and enjoy the sauna experience.

Thanks to the simple connectors, Bertilo saunas can be assembled quickly and easily. The wall and roof elements are joined using a straightforward push-fit system with furniture connectors.

The 40 mm mineral wool insulation is enclosed by 12 mm Nordic spruce profile boards made from fine-grained Nordic spruce on the inside and 6 mm moisture-resistant Resysta panels on the exterior. Resysta is an innovative and durable material with a texture similar to tropical hardwood. The panels are finished in a neutral RAL 9010 white using an eco-certified coating.

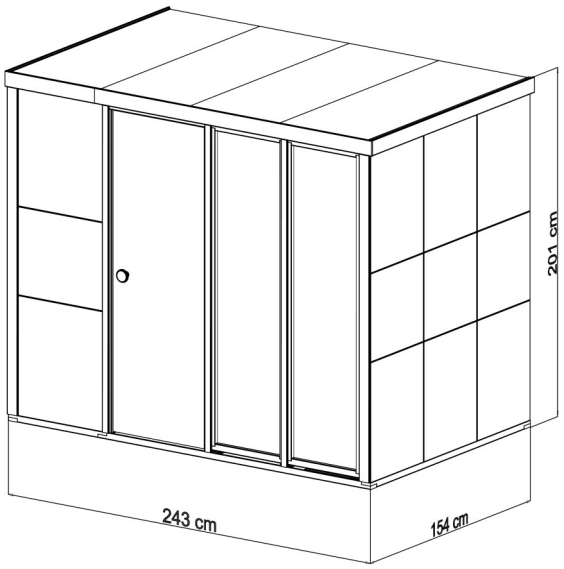

With a total wall thickness of 58 mm, double-insulated safety-glass windows, and an 8 mm safety-glass door, the sauna provides excellent thermal insulation and helps create a comfortable and enjoyable sauna climate.

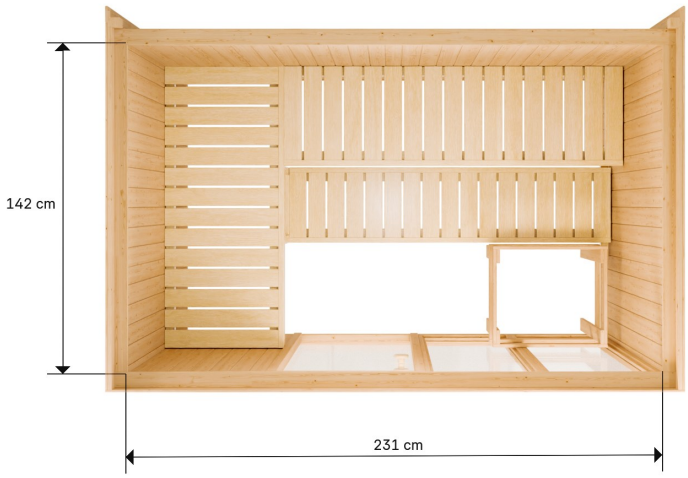

Exterior colour: WHITE (RAL 9010)

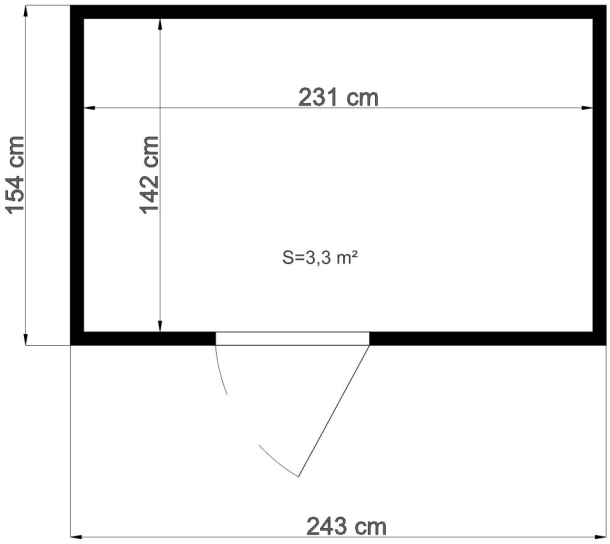

Data

Size	243 × 154 cm
Area	3,74 m^2
Frame	41 × 75 mm
